EDUCATION

Abiola Ajumobi Technical University

Bachelor of Software Engineering
2024 - 2028

SKILLS

- Languages: JavaScript, TypeScript, Python
- Frontend: React, HTML, Tailwind CSS, Responsive Design
- Backend: Next.js API Routes, REST API Design, Django
- Database: Postgres, Supabase
- Tools & Platforms: Git, Supabase, Vite
- Core Strengths:
 - System Architecture & Component Design
 - AI Integration (RAG, multi-provider systems)
 - Database Design
 - Interactive UI Development (state-driven interfaces)
 - Backend Development & API Structuring

PROFESSIONAL SUMMARY

Software Engineering Student, Frontend-focused developer with growing backend experience and a strong interest in building scalable, real-world applications. Experienced in developing complex interactive systems, including interactive web-based applications with AI integration. Possesses a solid foundation from structured training and continuous self-driven learning, with a focus on applying technical skills to practical product development.

PROJECT EXPERIENCE

BlockChain Event Ticketing Platform

Role: Backend Developer

- Leading backend development for an inter-campus blockchain-based event ticketing system
- Designing and implementing APIs for ticket management, authentication, and transactions
- Collaborating with frontend developers to ensure seamless integration
- Contributing to system architecture and scalability decisions

Interactive Virtual OS Portfolio

Role: FullStack Development

- Developed a Windows-inspired desktop environment in the browser
- Built modular apps: Terminal, File Explorer, Browser, AI Assistant
- Implemented custom window and system state management
- Integrated AI assistant with multi-provider support

AI Assistant System (RAG-Based)

Role: Full-Stack Integration

- Building a standalone retrieval-augmented AI system for contextual responses
- Structured project, skills, and experience data for intelligent querying
- Integrated multiple AI providers for flexible response handling
- Designed for integration into larger systems, including the OS portfolio

TRAINING AND DEVELOPMENT

Software Development Training

- Gained foundational knowledge in programming and web development at **AcK Institute**
- Transitioned into self-directed learning and project-based practice

INDUSTRIAL TRAINING

Seeking a SIWES placement to apply both frontend and backend skills in a professional environment, contribute to real-world systems, and gain hands-on industry experience.
